2D Animation

What will I learn?

You will learn how to introduce motion to your drawings by using Adobe Animate software which has got a huge range of tools that will produce movement in a very easy and fun way. You will learn how to draw a character, for example, and make it walk, run, blink, etc..

Entry Requirements

No previous knowledge is required for this course, we will start from the beginning.

Assessment / Exam

We will assess your progress via individual feedback from the tutor on the basis of observation. We will also have group feedback via screening of works.

Career Opportunities

The course programme is structured in a way that your learning will be progressively increasing so you can step into a high level (such as After Effects, for example).
